

### Traffic Calming Devices

Welcome to this **Perfect Driver** course. Throughout this course, we are going to look at the law, skills, techniques, and ideas to help you become a better, and safer driver.

In this lesson, we'll look at **Traffic Calming Devices**.

### Traffic Calming Devices

### Traffic Calming Devices

#### Traffic Calming Devices

Traffic calming devices are a range of techniques and products used by local councils to slow down traffic in certain areas.

This may be because of excessive noise, excessive speed, drag racing, hooning, or other illegal and/or dangerous activities.

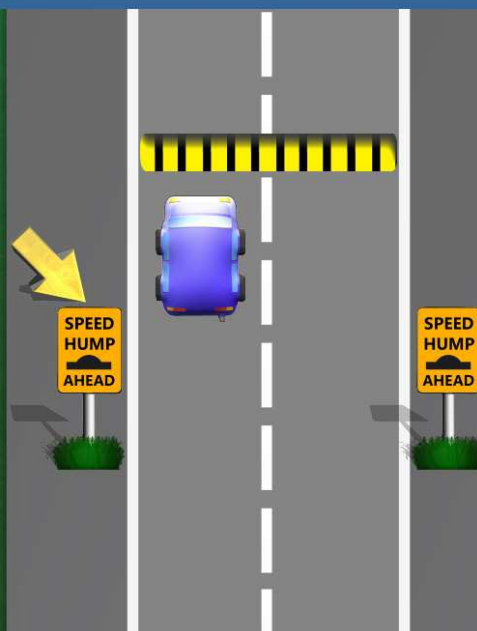

### Traffic Calming Devices

The most common traffic calming device is the humble **speed hump**, or **speed bump**. You'll see them on the road, in car parks, even in driveways. They are a raised bump on the road designed to slow people down.

Sporty, or lowered cars, need to take special care with speed bumps. They can damage wheels and the undercarriage of your car - especially if carrying a car load of adults.

Illustrated here is a sign you'll see when a speed bump is approaching. Slow down, and travel over the speed bump at a slow and safe speed.
